

PROGUARD LADDER ACCESS HATCH

Product Code	Pricing Unit	Colour	Dimensions	Pack Quantity	Pallet Quantity
PTLH	Each	RED	790MM X 640MM	1	400

Product Description:

Proguard Ladder Access Hatches are a great way of creating a safe access between floors on a construction site before stairs have been installed.

Constructed from high quality steel with an aluminium trap door and stainless-steel hinges, these hatches are designed to survive use on multiple sites and endure storage outside without seizing up.

Benefits:

- Reusable
- Durable steel construction
- Keep workers safe from falling through unprotected openings
- Tested to SWL – 350KG
- Made in the UK
- Durable red powder coated finish – increases visibility on site.

Limitations

- For temporary use only
- Safety depends upon quality of installation.

Application:

Place the hatch over an appropriately sized hole in the flooring deck. Secure the hatch using the fixing holes provided.

Data:

Dimensions	790MM X 640MM
Basic Component	High Quality Steel with Aluminium door.
